

WHAT MAKES THOMAS BENJAMIN A RATHER UNIQUE HARDWOOD FLOORING COMPANY?

RESPONSIVE DESIGN

During the design and specification process we are available to consult with you on every aspect, aesthetic, functional and budgetary, of your project. You are always welcome to come to our facility and work with our artists in our Custom Sampling Studio to develop the unique product dimensions, color, treatment or texture that fulfills your vision for your project.

MANUFACTURING CAPABILITIES

With the manufacturing power to produce millions of square feet per year, we still don't lose sight of the smallest detail. We control the quality throughout the manufacturing process in our own factory, carefully monitoring all stages of production to ensure the flooring is on-spec, on-grade and aesthetically correct. And we are always just a phone-call away if you have any questions or concerns.

DEPENDABLY AMERICAN MADE

Your reputation is on the line with every project, and you cannot afford to have problems. Stories abound of import flooring arriving months late, off-color, off quality or in some other way not-to-spec. And when that happens, replacement product is usually months away.

We at Thomas Benjamin are part of *your* team. Your concerns are our concerns. Your quality requirements are our quality requirements. And our production schedule is organized to meet your timetable.
